DOCUMENTATION HISTORY

Date	Description
03/2022	SQL2019 support added for FP18
10/2021	FP18 update and new product name
06/2021	Updating link to help resources
02/2021	Rebranding activities and Win2019
11/2020	Sinch rebranding and Sennheiser for Communication Panel
07/2020	More Jabra devices for Communication Panel
05/2020	Communication Panel headsets guidance and new chapter 1
01/2019	Win Server 2008R2, SQL Server 2008 R2 & Windows 7 removed. Social channels added.
05/2019	New devices from EPOS SENNHEISER added to the USB Headsets
02/2018	Windows Servers, SQL & Plantronics / Poly list updated. Other small modifications.
11/2017	A new device from Jabra and EPOS SENNHEISER added to the Wireless Headsets list.
01/2017	New devices from EPOS SENNHEISER added to the USB Headsets , Wireless Headsets and USB Adapters for Analog Headsets lists
12/2016	New devices from Jabra, Plantronics / Poly and VXi added to the USB Headsets and Wireless Headsets lists.

SINCH CONTACT CENTER HELP RESOURCES

Sinch Contact Center can be found at:

<https://docs.cc.sinch.com/>

Community pages:

https://community.sinch.com/t5/Sinch-Contact-Center/bd-p/Contact_Center

SINCH CONTACT CENTER CERTIFIED PRODUCTS

Certified indicates that Sinch or a technology partner has tested the product and that Sinch strives to maintain the compatibility. A certified product can be used with Sinch Contact Center (Sinch Contact Center, formerly known as SAP Contact Center & SAP BCM) but it does not mean that all the features of the product are supported, such as video calls, various indicators, multiline (e.g. mobile and PC) support and others.

Windows Servers

Windows Server 2012 R2

NOTE: We will drop support for Windows Server 2012 R2 and SQL 2012 in FP19 release.

Suitability and special notes

Windows Server 2012 R2 Standard edition can be used as Sinch Contact Center Application Server platform. More information about Windows Server 2012 R2 editions and edition comparison tables can be found from **Microsoft**. For new installations **Microsoft Windows Server 2019** is recommended.

Minimum setup

- One 2.0 GHz x86 or x64 based CPU
- 2 gigabytes (GB) of RAM
- 40 gigabytes (GB) of disk space
- One 100 Mbps network interface card

Recommended setup (minimum setup with the following modifications)

The recommended setup depends on the load and the server role and needs to be determined case by case. In general, the following recommendations apply.

- One or more multicore 2.0 GHz or faster x64-based CPUs
- 4 gigabytes (GB) of RAM or more if several Sinch Contact Center components are running on the same server
- 60 gigabytes (GB) or more of disk space if several Sinch Contact Center components are running on the same server
- Redundant hot pluggable and fast RAID disks or SAN based fault tolerant storage
- One or more 1000 Mbps network interface cards
- Hot pluggable redundant power supplies
- Hot pluggable redundant ventilators

Additional requirements

- English version of Windows Server 2012 R2
- See also: <http://technet.microsoft.com/en-us/library/jj134246.aspx> and <http://technet.microsoft.com/en-us/library/dn303418.aspx>

Support Lifecycle

Microsoft Mainstream support end date is 9.10.2018

Microsoft Extended support end date is 10.10.2023

(<https://support.microsoft.com/en-us/gp/lifeselectindex>)

Windows Server 2016

Suitability and special notes

Windows Server 2016 Standard edition can be used as Sinch Contact Center Application Server platform. More information about Windows Server 2016 editions and edition comparison tables can be found from Microsoft. **Windows Server 2019 is recommended for new installations.**

Minimum setup

- One 1.4 GHz 64-bit processor
- 2 gigabytes (GB) of RAM
- 32 gigabytes (GB) of disk space
- One 1000 Mbps network interface card

Additional requirements

- English version of Windows Server 2016 is recommended
- See

<https://docs.microsoft.com/en-us/windows-server/get-started/system-requirements>
<https://docs.microsoft.com/en-us/windows-server/get-started/installation-and-upgrade>

Microsoft Extended support end date is 11.1.2027

(<https://support.microsoft.com/en-us/lifecycle/search/1163>)

Windows Server 2019

Suitability and special notes

Windows Server 2019 Standard edition can be used as Sinch Contact Center Application Server platform. More information about Windows Server 2019 editions and edition comparison tables can be found from Microsoft. **Windows Server 2019 is recommended for new installations.**

Minimum:

- 1.4 GHz 64-bit processor
- 2 gigabytes (GB) of RAM
- 32 gigabytes (GB) of disk space
- One 1000 Mbps network interface card
- Compatible with x64 instruction set
- Supports NX and DEP
- Supports CMPXCHG16b, LAHF/SAHF, and PrefetchW
- Supports Second Level Address Translation (EPT or NPT)

Additional requirements

- English version of Windows Server 2019 is recommended
- See

also:

<https://docs.microsoft.com/en-us/windows-server/get-started-19/get-started-19>

Support Lifecycle

Microsoft Mainstream support end date is 1.9.2024

Microsoft Extended support end date is 1.9.2029

SQL Servers

SQL Server 2012

NOTE: We will drop support for Windows Server 2012 R2 and SQL 2012 in FP19 release.

Suitability and special notes

SQL Server 2012 is recommended to be run on Windows Server 2012 R2.

Minimum setup

The minimum setup for the Windows server

Recommended setup (minimum setup with the following modifications)

The recommended setup depends on the load and the estimated database size and needs to be determined case by case. In general, the following recommendations apply.

- One or more multicore 2.0 GHz or faster x64-based CPUs
- 16 gigabytes (GB) of RAM or even more if the databases are (estimated) big
- 500 gigabytes (GB) or more of disk space
- Clustering and backup solutions in compliance with SLA and DR requirements.

Additional requirements

- English version of SQL Server 2012
- See also: [http://msdn.microsoft.com/en-us/library/ms143506\(SQL.110\).aspx](http://msdn.microsoft.com/en-us/library/ms143506(SQL.110).aspx)

Support Lifecycle

Microsoft Mainstream support end date is 11.7.2017

Microsoft Extended support end date is 12.7.2022

(<https://support.microsoft.com/en-us/gp/lifeselectindex>)

SQL Server 2014

Minimum setup

The minimum setup for the Windows server

Recommended setup (minimum setup with the following modifications)

The recommended setup depends on the load and the estimated database size and needs to be determined case by case. In general, the following recommendations apply.

- One or more multicore 2.0 GHz or faster x64-based CPUs
- 16 gigabytes (GB) of RAM or even more if the databases are (estimated) big
- 500 gigabytes (GB) or more of disk space
- Clustering and backup solutions in compliance with SLA and DR requirements.

Additional requirements

- English version of SQL Server 2016
- See also: <https://docs.microsoft.com/en-us/windows-server/get-started/system-requirements>

Support Lifecycle

Microsoft Mainstream support end date is 7.9.2019

Microsoft Extended support end date is 7.9.2024 (Latest SP)

(<https://support.microsoft.com/en-us/lifecycle/search/1163>)

SQL Server 2016

Suitability and special notes

SQL Server 2016 is recommended to be run on Windows Server 2016.

Minimum setup

The minimum setup for the Windows server

Recommended setup (minimum setup with the following modifications)

The recommended setup depends on the load and the estimated database size and needs to be determined case by case. In general, the following recommendations apply.

- One or more multicore 2.0 GHz or faster x64-based CPUs
- 16 gigabytes (GB) of RAM or even more if the databases are (estimated) big
- 500 gigabytes (GB) or more of disk space
- Clustering and backup solutions in compliance with SLA and DR requirements.

Additional requirements

- English version of SQL Server 2016
- See also: <https://docs.microsoft.com/en-us/windows-server/get-started/system-requirements>

Support Lifecycle

Microsoft Mainstream support end date is 13.7.2021

Microsoft Extended support end date is 14.7.2026

(<https://support.microsoft.com/en-us/lifecycle/search/1163>)

SQL Server 2019

SQL server 2019 is supported from FP18 onwards. For minimum hardware requirements, see Microsoft documentation: <https://docs.microsoft.com/en-us/sql/sql-server/install/hardware-and-software-requirements-for-installing-sql-server-ver15?view=sql-server-ver15>

NOTE:

- Microsoft Reporting Service is separate installation in SQL 2019 and not part of the roles as in SQL 2016 and older
- "Reporting Services" path looks to be a bit different so it should be checked carefully in IA

Reporting Services Instance Name or Path	PATH:C:\Program Files\Microsoft SQL Server Reporting Services\SSRS\
Reporting Services 'Report Server' Site Address	[REDACTED]
Reporting Services 'Report manager' Site Address	[REDACTED]

Additional requirements

- English version of SQL Server 2019 is recommended
- See also: <https://docs.microsoft.com/en-us/windows-server/get-started/system-requirements>

Support Lifecycle

Microsoft Mainstream support end date is 14.1.2025

Microsoft Extended support end date is 8.1.2030

(<https://docs.microsoft.com/en-us/lifecycle/products/sql-server-2019>)

Voice over IP Gateways

NM-HDV ⁽¹⁾	Cisco	X	X	1	2	EOL

- ¹⁾ NM-HDV is a High Density Voice Network Module that can be installed in a Cisco multiservice Modular Access router. A VWIC module with 1 or 2 E1 or T1 ports and a required number of PVDM (DSP) modules are installed on the NM-HDV module. One PVDM-12 module is capable of running twelve calls using medium complexity CODEC (G.711, G.729a/b) or six calls using a high complexity CODEC (G.729).
- ²⁾ The compatibility of 2900 and 3900 series routers are tested with Cisco 3925-V/K9 (SIP) and the compatibility of other models is based on similarity. Contact your Cisco dealer for more information about Cisco products, configurations and capacities.
- ³⁾ Available in software version 5.0 and earlier. AudioCodes H.323 is not available for purchase since 2012.

Supported routers and the maximum number of NM-HDAs, ports and voice channels supported

See www.cisco.com for detailed information about, for example, configuration, required memory amounts and minimum IOS versions.

SIP Session Border Controllers

Product	Manufacturer	Min Capacity	Max Capacity	Version	Remark
Mediant 500 E-SBC	AudioCodes	5	250		
Mediant 800 E-SBC	AudioCodes	5	250		
Mediant 1000 E-SBC	AudioCodes	5	150		
Mediant 2600 E-SBC	AudioCodes	100	600		
Mediant 3000 E-SBC	AudioCodes	252	1008		
Mediant 4000 E-SBC	AudioCodes	250	5000		
Mediant 9000 SBC	AudioCodes	2000	16000		Future firmware versions to support higher capacities
Mediant VE SBC	AudioCodes	25	2000		Future firmware versions to support higher capacities
Mediant SE SBC	AudioCodes	250	16000		Future firmware versions to support higher capacities

For voice enabled ECF (Communication Panel) it's required to have SBC device that can handle WebRTC. The Mediants do require additional license for that. Please contact your local reseller for details.

Telecom Operator Provided SIP Trunks

Product	Manufacturer	Remark
SIP trunk	Colt	Certified by AudioCodes in March 2014 using AudioCodes SBC in front of Sinch Contact Center. Configuration notes are available on AudioCodes web pages. Colt SIP trunk software version 8.4.4 Fax excluded.
SIP trunk	Sinch	
SIP trunk	Twilio	

Client Workstations

Windows 8.1 Pro and Enterprise

Minimum setup

- PC with 1-GHz 32-bit (x86) or 64-bit (x64) processor with support for PAE, NX and SSE2
- 1 gigabytes (GB) of RAM (32-bit) or 2 gigabytes (GB) of RAM (64-bit)
- 16 gigabytes (GB) of disk space (32-bit) or 20 gigabytes (GB) of disk space (64-bit)
- Video adapter and monitor with the resolution 1024 x 768
- Keyboard and mouse or some other pointing device
- 10 Mbps network interface card
- 1 free USB port (version 2.0)
- Internet Explorer 11 with the familiar user experience (not with the new Windows UI)

Recommended setup (minimum setup with the following modifications)

- 100/1000 Mbps network interface card

Additional requirements

- A USB audio device with a microphone and a speaker is required, unless MTD mode is used.
- Call controls (such as hook switch and mute) on the USB device (optional).
- A sound card for playing the ringing tone on the PC speaker (optional)
- See also: <http://windows.microsoft.com/en-us/windows-8/system-requirements>

NOTE! Windows 8 desktop UI is supported, not Windows 8 modern UI.

NOTE! Windows 8 is supported only until the 12th of January 2016. Use 8.1 or newer.

Support Lifecycle

Microsoft Mainstream support end date is 9.1.2018 (Windows 8.1)

Microsoft Extended support end date is 10.1.2023 (Windows 8.1)

<https://support.microsoft.com/en-us/lifecycle?C2=16796>

Windows 10 Pro and Enterprise

Minimum setup

- PC with 1-GHz processor
- 1 gigabyte (GB) of RAM (32-bit) or 2 gigabytes (GB) of RAM (64-bit)
- 16 gigabytes (GB) of disk space (32-bit) or 20 gigabytes (GB) of disk space (64-bit)
- Video adapter and monitor with the resolution 1024 x 768
- Keyboard and mouse or some other pointing device
- 10 Mbps network interface card
- 1 free USB port (version 2.0)
- Internet Explorer 11 with the familiar user experience (not with the new Windows UI)

Recommended setup (minimum setup with the following modifications)

- 100/1000 Mbps network interface card

Additional requirements

- A USB audio device with a microphone and a speaker is required, unless MTD mode is used.
- Call controls (such as hook switch and mute) on the USB device (optional).
- A sound card for playing the ringing tone on the PC speaker (optional)
- See also: <https://www.microsoft.com/en-us/windows/windows-10-specifications>

Support Lifecycle

Microsoft Mainstream support end date is 13.10.2020

Microsoft Extended support end date is 14.10.2025

(<https://support.microsoft.com/en-us/gp/lifeselectindex>)

Communication Panel – USB Audio Devices

Sinch Contact Center Communication Panel is the modern user interface for Sinch Contact Center agent. The application doesn't require any installations on workstation and utilizes WebRTC protocol for the audio. Therefore, a WebRTC capable SBC (Session border Controller) is required in the network infrastructure. Please see chapter 1.4 SIP Session Border Controllers for Sinch verified devices.

The Communication Panel application uses any audio devices, that is, speakers and microphones, directly via audio services provided by the operating system. However, for controls, such as, hook switch and mute Sinch adaptation is needed. The reason being that each headset manufacturer has their own method to command the functions. In general browsers are not able to control USB devices directly, but the functions are done for example via JavaScript library or restful interface.

NOTE! Headset vendors do typically have two version of headset. One with Microsoft Teams integration and one without. We recommend using the one without Microsoft Teams integration.

Jabra

The Jabra solution consists of a *Google Chrome web extension* and a *native Chromehost application* that must be installed separately on your workstation. Once solution is set up and running you can command the functions, such as, hook switch and mute. The prerequisites for using the controls are:

- Windows or Mac operating system
- Google Chrome browser
- Native Chromehost v.2.0 – can be downloaded from <https://github.com/gnaudio/jabra-browser-integration>
- Jabra Browser Integration Extension v.2.1.0 or higher from Chrome Web Store
- Jabra Direct software installed on your workstation (*not mandatory*)
- Jabra selected as Audio Device Brand in Communication Panel settings

According to Jabra the adaptation supports all professional Jabra headsets and Jabra speakerphones. I.e. the *Jabra Evolve* series, the *Jabra Pro* series, the *Jabra Biz* series, and the *Jabra Speak* series. For this release, Sinch has verified the following Jabra devices with Communication Panel:

Model	FW*	Comments
Engage 50	1.25.0	With Engage Link (FW 1.22)
Evolve 20	3.7.0	
Evolve 40		With Evolve Link (FW 3.10.3)
Evolve 65	2.72.2	With Link 370 BT (FW 1.50.0)
Evolve 75	2.10.0	With Link 370 BT (FW 1.48.0)
Evolve2 40	1.15.0	MS Teams features not supported
Evolve2 65	2.3.9	With Jabra Link 380 BT (FW1.6.6) MS Teams features not supported
Pro 9470	4.7.0	
Engage 65	4.2.0	
Engage 75	4.2.0	
Link 950	1.29.0	Tested with Evolve 65 and was not connected to deskphone

*Headset is tested with this firmware, use this or later. Version can be checked and upgraded via Jabra Direct software.

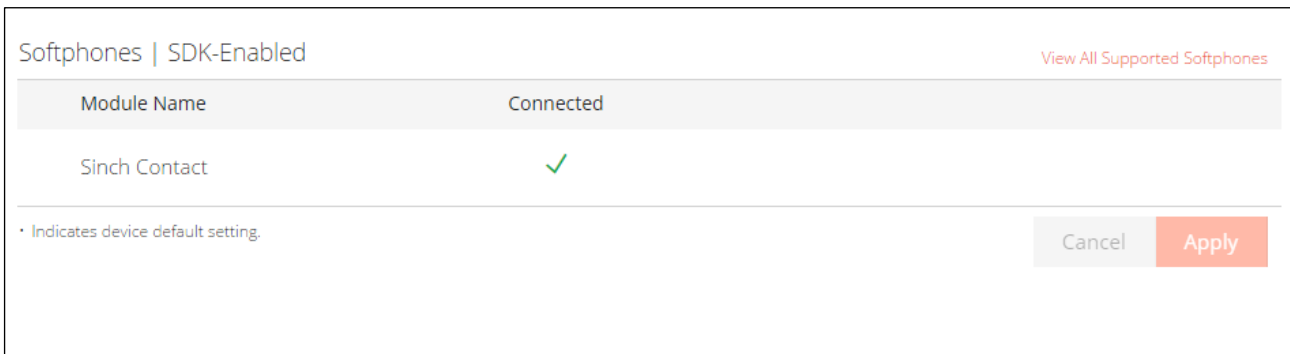

Poly (Plantronics)

The Poly solution consists of JavaScript library and SDK provided inside Plantronics HUB software, the Plantronics HUB must be installed and running on your workstation. Once solution is set up you can command the functions: answer/end, mute/unmute and volume level from the headset.

The prerequisites for using the controls are:

- Windows operating system (not verified with MAC)
- Google Chrome or Microsoft Edge
- Plantronics HUB installed on your workstation
- POLY | Plantronics selected as Audio Device Brand in Communication Panel settings

Established connection between Communication Panel and headset can be seen in Plantronics Hub -> Softphones -> Softphones SDK enabled -> Sinch Contact

Model	FW*	Comments
EncorePro 525 USB	USB v.136	(1
EncorePro 715 USB	USB v.136	(1
EncorePro 725 USB	USB v.136	(1
Blackfire 7225	1.1153.1.1064	(2
Voyager Focus UC + BT600	V.500 + v.2120	(1
Savi 8240 UC	Headset v.1725 USB v.3868	(1 + (3
Savi 8245 UC	Headset v.1725 USB v.3869	(1 + (3

*Headset is tested with this firmware, use this or later. Version can be checked and upgraded via Poly software.

(1 No issues with Microsoft Teams identified

(2 Controls not working when Microsoft Teams is running

(3 Set from Plantronics HUB following settings on "Audio Sensing turned " & "Headset To Pc Radio Link - Active Always"

EPOS | Sennheiser

The EPOS solution consists of JavaScript library and SDK provided inside *EPOS connect* software, the EPOS Connect must be installed and running on your workstation. Once solution is set up you can command the functions: answer/end, mute/unmute hold/resume call and ring notification from the headset.

The prerequisites for using the controls are:

- Windows or Mac operating system
- Google Chrome, Firefox or Opera (Edge not yet tested by EPOS 09/2020)
- EPOS Connect software installed on your workstation.
- In EPOS Connect Default Softphone defined as Sinch Contact Center
- EPOS | SENNHEISER selected as Audio Device Brand in Communication Panel settings

For this release, Sinch has verified the following EPOS | Sennheiser devices with Communication Panel:

Model	FW*	Comments
IMPACT SC 1x5	44.05.18.18	
IMPACT SC 160	44.05.18.30	
IMPACT SC 635	15.08.89.89	
IMPACT SC 660	15.08.89.89	
IMPACT SC 665	15.08.89.89	
SP30	4.5.36	
DW Pro1	169	

*Headset is tested with this firmware, use this or later. Version can be checked and upgraded via EPOS Connect software.

Communication Desktop – USB Audio Devices

Most USB devices used with Sinch Contact Center Communication Desktop contain logically three different devices. These are

- sound playback (speaker)
- sound capture (microphone)
- Human Interface device (HID)

Sinch Contact Center Communication Desktop uses any audio devices, that is, speakers and microphones, directly via audio services provided by the operating system. In most cases, these devices don't need any Sinch Contact Center adaptation module, and, for example, corded USB audio devices work without any adaptation module being installed. Sinch Contact Center adaptation modules enables usage of HID devices, which provide controls, such as, hook switch, mute, open audio path and close audio path. Sinch Contact Center adaption modules for supported devices are available as Windows installer files, for example, terminal_HS_USBHs.msi. See Sinch Contact Center Client Workstation Guide for installation instructions of the adaptation modules.

Wireless devices usually require that Sinch Contact Center opens the audio path between the cradle and the device when a call begins and that Sinch Contact Center closes the audio path when the call ends. The audio path control is done using the HID device and thus, wireless devices usually require that an appropriate adaptation module is installed.

Call control in the following tables refer to, at a minimum, hook-off and hook-on for answering and terminating calls. When appropriate, it may also include additional functionality, such as open line and close line. This kind of functionality is usually unnoticed by users and perceived as being part to the hook-off or hook-on event. All call control events are not supported by all devices. For example, rejecting an incoming call is in most cases possible only by using controls in CDT.

The compatibility tables list compatible USB devices, their key features and the adaptation module supporting the logical HID device.

- SDK based adaptation modules are terminal_HS_GNNetcom.msi, terminal_HS_Plantronics / Poly.msi and terminal_HS_Plantronics / PolyV3.msi. See remarks in the compatibility tables for respective devices. Terminal_HS_GNNetcom.msi, terminal_HS_Plantronics / Poly.msi and terminal_HS_Plantronics / Poly_V2.msi are obsolete but included to support old devices.
- Terminal_HS_USBHS.msi based adaptation. This method reads HID descriptors from the device to obtain information about available controls and how to use them.

NOTE! Up till Sinch Contact Center7 SP5 **only one of these alternative methods should be used** on any workstation. From Sinch Contact Center7 SP6 and onwards **more than one of the above** terminal_HS_XXX.msi files can be used. In this case, selection rules are configured in a handset.ini file.

NOTE! Headset vendors do typically have two version of headset. One with Microsoft Teams integration and one without. We recommend using the one without Microsoft Teams integration.

Recommendation: Do not install terminal_HS_XXX.msi files that are not needed.

USB Handsets and Speaker Phones

Product	Manufacturer	Call control	Volume ctrl	Dial-pad	Mute	HID	USBHID	Remark
CX100	Polycom	X	X ⁽³⁾		X	X

MCD100	Plantronics / Poly		X ⁽²⁾		X			Speaker phone / audio only device. EOL

- 1) Device volume control complies with CDT (audio)
- 2) Device volume control affects CDT wave
- 3) Device volume control does not affect CDT volume settings
- a) Requires driver
- b) Dialed digits are sent to CDT. A hook-off in CDT is required to fire the call

Wireless Handsets

Product	Manufacturer	Call control	Volume. ctrl	Mute	B/D	HID	USBHID	Remark
Handset 450	Jabra	X	X ³⁾	X	D		X	1. Lifting off the handset from the cradle does not cause digits previously entered in CDT to be sent. 2. It is possible to answer and dial calls with the handset placed in the cradle. In this case, audio will not be (well) heard as the device is not a speaker phone. 3. Adjusting volume will bring up the Windows (B&W) on-screen volume bar but it will not adjust the Windows volume.

- 1) Device volume control complies with CDT (audio)
- 2) Device volume control affects CDT wave
- 3) Device volume control does not affect CDT volume settings

USB Adapters for Analog Headsets

The digital side of USB adapters connects to USB ports on workstations. The adapters provide conversion between digital and analog audio and they may also provide hook switch and other controls. The analog side of the adapters connects to analog headsets using a manufacturer specific connector. The Sinch Contact Center interfacing component is the USB adapter and analog headsets are not tested for compatibility. Information on analog headsets that are compatible with the adapters can be found from the manufacturers.

HID Support for HID devices must be installed on the client workstation (terminal_HS_HIDHS.msi) instead of selecting any supported audio devices in the installation wizard (terminal.msi) .

- 1) Device volume control complies with CDT (audio)
- 2) Device volume control affects CDT wave
- 3) Device volume control does not affect CDT volume settings
- 4) Volume adjustment is local on the device.
- 5) CDT and device MUTE are synchronized
- 6) Requires installation of terminal_HS_Plantronics / PolyV2.msi (also installable with the terminal.msi wizard) and Plantronics / Poly Enterprise Software SDK version 2.4, downloadable for free at <http://www.Plantronics / Poly.com/us/support/software-downloads/enterprise-sdk.jsp>.

- 7) Requires installation of terminal_HS_Plantronics / Poly.msi instead terminal_HS_Plantronics / PolyV2.msi and Plantronics / Poly SDK 2.4. Not installable using the installation wizard.

SIP Desk Phones

Listed SIP phones perform the following operations properly with Sinch Contact Center: register, inbound call, outbound call, hold, transfer and sending DTMF. The operations work using any of the transport protocols UDP, TCP or TLS. Exceptions and prerequisites or other requirements may be included in table. Additional features present on the phone may or may not work.

SIP-T22P

SIP-T28P

SIP-T32G

SIP-T38G

Since established in 2001, Yealink, the global TOP 5 SIP Phone provider, has been committed to designing and manufacturing innovative, highly stable and easy to deploy IP phones with reasonable price and rapid technical support. The company has adopted the first-class solutions and technologies such as TI Chipset, and has become the determined choice of the industry's leading VoIP service providers, hosted VoIP, IP PBX and Unified Communications solution vendors.

Mobile Devices

CMC - DEPRECATED

Supported platforms for CMC (Communication Mobile Client) were:
 Nokia S60 3rd edition
 Nokia S60 5th edition

ECF- Communication Panel

ECF based softphone, such as a Communication Panel can be used in a browser that supports [WebRTC](#) technology. Sinch Verified and supported browsers are:

- Google Chrome on Windows10 & Mac
- Firefox on Windows 10
- Opera on Windows 10
- Microsoft Edge (Chromium based) on Windows 10

Other

Analog Adapters and Gateways

Product	Manufacturer	Remark
ATA 186	Cisco	
IP21	Innovaphone	
MP-112	Audiocodes	
MP-114	Audiocodes	
MP-118	Audiocodes	
MP-124D	Audiocodes	

Analog adapters are used to connect analog terminals, e.g. fax devices, to Voice over IP systems such as Sinch Contact Center.

Outbound Predictive Dialer

Product	Manufacturer	Remark
SoftDial	Sytel	Version 10.5.

Fax

Fax server is used e.g. to receive customer service related faxes such as orders. Fax server receives incoming fax, converts it to file/picture format and sends fax as email attachment to defined email address for Sinch Contact Center to be retrieved routed to customer service agents.

SMS

SMS messages can be transmitted and received by Sinch Contact Center as e-mails to/from a SMS service on the network. Sinch Contact Center can be also integrated to following messaging services:

- Sinch SMS
- SAP Digital Interconnect
- Twilio

SIP Integrated IVR

Product	Manufacturer	Remark
Holly Voice Platform	West Corporation	See details below

The Holly Voice Platform (HVP) is a SIP based IVR platform. It is certified VoiceXML 2.0 and 2.1 compliant and supports CCXML 1.0. The current version (in 2014) is HVP 6.0 SP2. The Holly Voice Platform is supported on the following systems:

- Red Hat Enterprise Linux 6.x i386 or x86-64
- CentOS release 6.x i386 or x86-64
- Red Hat Enterprise Linux/CentOS 5.4+ i386
- Solaris 10 update 4 or greater

Minimum configuration: 2 GB Memory, 1.5 GB spare disk, 2 GHz or greater CPU

In addition to on premise solutions West provides several hosted Holly configurations. These solutions can be accessed by both PSTN and SIP. Applications can be developed and hosted by West or developed by the customer and run on the West infrastructure.

Chatbot

Sinch Contact Center has interface that can be used to integrate a chatbot to the system. The interface allows a chatbot act as an agent in Sinch Contact Center system. Sinch has verified following chatbot vendors:

- Chatlayer.ai: <https://chatlayer.ai>
- SAP Conversational AI (CAI, formerly Recast) <https://www.sap.com/products/conversational-ai.html>
- Ultimate.AI: <https://www.ultimate.ai/>
- Artificial Solutions: <https://www.artificial-solutions.com/>
- Interactive Media: <https://www.imnet.com/>

For examples how to utilize other chatbot vendors please contact support.

Social channels

Facebook messenger integration configurable directly to a Facebook account or via Sinch Conversation API

WhatsApp integration available through:

- Sinch Conversation API (text, templates and rich content)
- SAP Digital Interconnect - deprecated* (text and rich content)
- Twilio (only text)

Other social channels available via Sinch Conversation API. For more details, please check <https://www.sinch.com/products/apis/messaging/conversation-api/>

SINCH CONTACT CENTER COMPATIBLE PRODUCTS

Compatible indicates that Sinch has tested the product once but does not re-test newer versions.

IP PBX and UC Systems

Product	Manufacturer	Remark
Lync	Microsoft

Product	Manufacturer	Remark
SIP trunk	TDC Sweden TDC Norway	Requires Sinch Contact Center 7 SP8. See SAP KB-article 2081828 – “Configuring Sinch Contact Center for TDC Sweden/Norway SIP trunks”
SIP trunk	BT UK	Certified in May 2012. Fax excluded.
SIP trunk	Twilio	
SIP Trunk	Sinch	

Virtualization Solutions

Product	Manufacturer	Remark
VMware ESXi 5.0	VMware	More info in VMware compatibility statement that can be asked from support
XenApp 6.5 Receiver 14.0.1.4	Citrix	Shared Server Desktop. See Citrix compatibility statement with Sinch Contact Center
XenDesktop 7	Citrix	Citrix Desktop virtualization. See Citrix compatibility statement with Sinch Contact Center

SINCH CONTACT CENTER USER VERIFIED PRODUCTS

The user verified category lists products that *customers and partners have reported to be compatible with Sinch Contact Center*. The information is provided as such and Sinch does not in any way guarantee that the products work.

IP PBX and UC Systems

Product	Manufacturer	Remark
Alcatel OXE, Release 9.0, Patch H1.301.34	Alcatel	The PBX is connected to Sinch Contact Center directly using SIP without any intermediate gateway. Tested with BCM 6 only.
Asterisk 1.8.4.4	Open Source Digium	Settings in /etc/asterisk/sip.conf [general] dtmfmode = auto relaxdtmf=yes compactheaders = no Reload SIP channel with <i>module reload chan_sip.so</i> in Asterisk CLI. Disable PRACK (100rel) in Sinch Contact Center
	Alcatel-Lucent	R9.1 -i1.605.-27
	Alcatel-Lucent	R9.1 -i1.605.-29
	Alcatel-Lucent	R9.1 -i1.605.-39-pl-c82
	Alcatel-Lucent	R10.0-j1.410-38-c-it-c0
	Alcatel-Lucent	R10.1-j2.603-13-f

SBC & WebRTC

Product	Manufacturer	Remark
Kamailio & RTPEngine	OpenSource	Kamailio latest version on Centos, RTPEngine & RTP packet forwarding in kernel module

Telecom Operator Provided SIP Trunks

Product	Manufacturer	Remark
SIP trunk	TDC Finland	
SIP trunk	TeliaSonera Finland	
SIP trunk	BT Germany	
SIP trunk	Verizon	

SAMPLE SINCH CONTACT CENTER SERVERS

These are Sinch Contact Center server hardware examples only. For further information, please review Sinch Contact Center Infrastructure document.

Small In-House Setup

The setup contains the following servers:

- 1 SQL Server Cluster
- 1 Sinch Contact Center Application server(s) (1 + as Connection Server in DMZ if CMC is used)

SQL Server:

- x86 cluster server with 1 or more CPUs
- 8 GB or more RAM
- 2 or more 100/1000 Base-T Ethernet ports per node
- Redundant (e.g. RAID 1 (2x15K drives)) 73 GB or more disk space for op.sys and applications per node
- Redundant (e.g. RAID 5 or 1+0 (15K hot pluggable drives)) 500 GB or more disk space for databases
- Redundant Power Supply
- Redundant ventilators
- Windows Server OS (English recommended) (2 node failover cluster possible with Standard edition)
- SQL Server software (English)

Sinch Contact Center Application servers:

- x86 server with 1 or more CPUs
- 4 GB or more RAM
- 1 or more 100/1000 Base-T Ethernet ports per node
- Redundant (e.g. RAID 1(2x15 K drives)) 73 GB or more disk space
- Redundant Power Supply
- Windows Server OS (English recommended)

Basic Service Provider Setup

The setup contains the following servers:

- 1 SQL Server Cluster
- 2 Sinch Contact Center Application servers (+ 1 as Connection Server in DMZ if CMC is used)
- 1 Sinch Contact Center Reporting Server

SQL Server:

- x86 cluster server with 1 or more CPUs
- 16 GB or more RAM
- 2 or more 100/1000 Base-T Ethernet ports per node
- Redundant (e.g. RAID 1 (2x15K drives)) 73 GB or more disk space for op.sys and applications per node
- Redundant (e.g. RAID 5 or 1+0 (15K hot pluggable drives)) 1 TB or more disk space for databases
- Redundant Power Supply
- Redundant ventilators
- Windows Server OS (English recommended)
- SQL Server software (English)

Sinch Contact Center Reporting (SQL) server:

- x86 server with 1 or more CPUs
- 8 GB or more RAM
- 1 or more 100/1000 Base-T Ethernet ports per node
- Redundant (e.g. RAID 1 (2x15K drives)) 73 GB or more disk space for op.sys and applications
- Redundant (e.g. RAID 5 or 1+0 (15K hot pluggable drives)) 146 GB or more disk space for databases
- Redundant Power Supply
- Windows Server OS (English recommended)
- SQL Server software (English)

Sinch Contact Center Application servers:

- x86 server with 1 or more CPUs
- 4 GB or more RAM
- 2 100/1000 Base-T Ethernet ports per node
- Redundant (e.g. RAID 1 (2x15K drives)) 73 GB or more disk space
- Redundant Power Supply
- Windows Server OS (English recommended)

Service Provider Setup with SAN

The setup contains the following servers:

- 1 SQL Server Cluster (Can serve several Sinch Contact Center systems)
- 2 or more Sinch Contact Center Application servers (1 in core and 1 in access NW)
- 2 or more Sinch Contact Center failover Application servers (1 per NW, each can backup several application servers but usually only 1 at a time)
- 1 Sinch Contact Center Reporting Server
- 1 Sinch Contact Center Application server as Connection Server in the DMZ, if CMC is used (optional)
- 1 Sinch Contact Center Application server as Management server. (Can serve several Sinch Contact Center systems)

SQL Server: (SQL cluster is made of two or more of these)

- x86 server with 1 or more CPUs
- 16 GB or more RAM
- 2 or more 100/1000 Base-T Ethernet ports per node
- Redundant (e.g. RAID 1 (2x15K drives)) 73 GB or more disk space for op.sys and applications per node
- 1 or more HBA (host bus adapter) for SAN connection and database storage
- Redundant Power Supply
- Redundant ventilators
- Windows Server OS (English recommended)
- SQL Server software (English)

Sinch Contact Center Reporting (SQL) server:

- x86 server with 1 or more CPUs
- 8 GB or more RAM
- 1 or more 100/1000 Base-T Ethernet ports per node
- Redundant (e.g. RAID 1 (2x15K drives)) 73 GB or more disk space for op.sys and applications
- 1 or more HBA (host bus adapter) for SAN connection and database storage
- Redundant Power Supply
- Windows Server OS (English recommended)
- SQL Server software (English)

Sinch Contact Center Application servers:

- x86 server with 1 or more CPUs
- 4 GB or more RAM
- 2 100/1000 Base-T Ethernet ports per node
- Redundant (e.g. RAID 1 (2x15K drives)) 73 GB or more disk space
- Redundant Power Supply
- Windows Server OS (English recommended)
